081343692414 | aryasandytia26@gmail.com | <https://www.linkedin.com/in/salmanaryasandytia> | <https://salmanars.vercel> Semarang, Central Java, Indonesia

A fresh graduate in Computer Engineering from Diponegoro University with a strong academic record (GPA 3.86/4.00) and hands-on experience in full-stack web development and software delivery. Skilled in building scalable features, integrating services, and ensuring product reliability through good engineering practices. Strong communicator with a proven ability to learn new concepts quickly, working effectively both independently and in teams.

Work Experiences

AssistX Enterprise - Jakarta, Indonesia Jan 2026 - Present
Frontend (Internship) - Remote

- Collaborated with Backend, QA, and UI/UX teams in an Agile (sprint-based) environment using Jira and GitLab, completing 5 sprints with improved team productivity.
- Developed frontend features across 3+ product epics, including internal applications and external partner systems, using Next.js in staging and production environments.

PT Inovasi Kolektif Digital - Semarang, Indonesia Nov 2025 - Jan 2026
Product Engineer (Internship) - Remote

- Built and documented 10+ REST API endpoints with JWT authentication, consistent validation, and standardized error handling.
- Delivered a Next.js website and CMS with Cloudflare R2 media storage, reducing content publishing time from hours to minutes and enabling updates without code changes.
- Improved security and observability with Cloudflare WAF, Sentry, and PostHog, accelerating issue detection and debugging.

CV. Karsa Cipta Teknologi Indonesia - Semarang, Indonesia Aug 2024 - Dec 2024
Frontend Developer (Freelance) - Remote

- Developed the frontend web platform for a medical tutoring service using Next.js and clean architecture principles, improving user experience and enabling a more maintainable and scalable codebase.
- Implemented 5+ core frontend features, including payment gateway integration on the client side, to support user transactions and platform functionality.
- Optimized the application for mobile and desktop devices, ensuring responsive design, cross-device compatibility, and improved user navigation and engagement.

Diskominfo Prov. Jawa Tengah - Semarang, Indonesia Jul 2024 - Aug 2024
Fullstack Developer (Internship) - On-site

- Developed a Next.js and Firebase monitoring dashboard for 1,000+ government domains, centralizing uptime status, ownership details, and historical tracking for Diskominfo Central Java.
- Implemented automated WhatsApp alerts for domain status changes, notifying administrators within minutes of detection and reducing incident discovery from hours to minutes.
- Built the Laravel-based e-Fasilitasi web application to digitize internal facilitation workflows, enabling role-based requests, approvals, and reporting while reducing manual spreadsheet-driven administration.

Education Level

Universitas Diponegoro - Semarang City, Central Java Aug 2022 - Apr 2026
Bachelor of Computer Engineering, 3.86/4.00

- Gold Medal, World Young Inventors Exhibition, WYIE 2025, Malaysia
- Finalist, Software Development Competition, ITCONVERT 2025, Universitas Jember
- Finalist, Web Application Competition, TECHCOMNFEST 2025, Politeknik Negeri Semarang
- First Place, Web Competition, CITECH 2024, Universitas Jember
- First Place, UI UX Competition, NIFC UMRI 2024, Universitas Muhammadiyah Riau
- Second Place, Web Competition, FESTIDA 2024, Universitas Darussalam Gontor

Organisational Experience

BEM FT Universitas Diponegoro Aug 2023 - Nov 2024
Statistical Unit

- Prepared concise evaluation reports for eight BEMFT departments, consolidating activity data and key findings with actionable recommendations.

- Designed a social awareness infographic for the Faculty of Engineering, reaching and engaging 100+ students.

Google Developer Student Club

Sep 2023 - Dec 2024

Event Organizer

- Coordinated an industry visit to IT BCA for 50+ students, managing event logistics, scheduling, stakeholder coordination, and participant communication.
- Coordinated three webinars for GDSC Undip members, overseeing event planning, promotion, speaker coordination, and end-to-end execution.

Computer Engineering Research Club

May 2023 - Nov 2025

Software Division

- Delivered frontend training for 10+ students using React, covering component-based development and modern UI practices.
- Mentored 10+ students to build REST APIs using Express and MongoDB, focusing on routing, validation, and database integration.

Forum Studi Teknik

Mar 2024 - Jan 2025

Website Division

- Developed and maintained two internal websites, including a company profile site and an anniversary microsite, ensuring content accuracy and reliable updates.
- Planned and implemented a structured program schedule for 20+ cross-division initiatives, published and managed through the company profile website.
- Coordinated a Website Division team of 30+ members, managing task distribution, timelines, and cross-team communication to ensure timely delivery.
- Managed 10+ blog posts by organizing content, updating pages, and maintaining relevance across the organization's website.
